

Kevin Carpenter

Senior Full Stack Engineer | Headless eCommerce & High-Compliance Systems

3734 40th st, San Diego, CA 92105 • kearpdev@gmail.com • (206) 902 7427 • <https://linkedin.com/in/kevin-carpenter-304a4554>

Summary

Senior Full Stack Engineer with 14+ years delivering enterprise eCommerce, ERP integrations, and regulated systems at scale. Expert in headless Shopify, BigCommerce, Magento, and Oracle NetSuite. Led 100+ digital transformations for Nike, Adidas, and McDonald's. Skilled in React, Next.js, Node.js, TypeScript, AWS, Azure, Docker, and CI/CD pipelines. Applying LLMs, OpenAI and Claude APIs, RAG, AI Agents, and MCP Servers to production workflows.

Skills

Frontend: React, React Native, Next.js, Gatsby.js, Tailwind CSS, HTML5/CSS3/SCSS, Framer Motion, Vue.js

Backend & APIs: Node.js, RESTful APIs, NetSuite RESTlets, Suitelets, PHP 7, Express.js

eCommerce Platforms: Headless Shopify (Storefront API), Headless BigCommerce (Stencil/React Hybrid), Magento 2, SuiteCommerce, Custom Shopify Liquid

ERP & Integrations: Oracle NetSuite, NetSuite CRM, Celigo, SuiteScript, Workday integrations, data import/export pipelines

CMS & Content: Sanity, Payload CMS, ExpressionEngine

Cloud & DevOps: Azure Serverless, Azure Functions, Azure Cosmos DB, AWS, Docker, CI/CD pipelines, GitHub Actions, multi-tenant SaaS architecture

Databases: PostgreSQL, MySQL, MongoDB, Redis, Azure Cosmos DB

Regulated Systems: iGaming portals (DC iLottery), HIPAA-compliant HealthTech, government-grade web platforms

Data & Operations: Programmatic SEO, large-scale SKU management (340K+), spreadsheet data manipulation, custom CRM development

UI/UX & Design: Figma, responsive design, cross-platform UI, Foundation 6, Bootstrap 4

Languages: JavaScript (ES6+), TypeScript, PHP, jQuery, Bash

Leadership: Technical architecture, project management, cross-functional team leadership, developer mentorship

AI & Automation: OpenAI APIs, Claude APIs (Anthropic), LLMs, Generative AI, AI Agents, Retrieval-Augmented Generation (RAG), Prompt Engineering, MCP Servers, Vector Databases, LangChain, AI-assisted software development, workflow automation

Experience

Senior Full Stack Engineer / Lead Developer / Product Lead

Next Generation Technologies (NGT) | Remote | Mar 2023–Present

Team Leadership & Architecture

- Lead a cross-functional team of 4–6 developers across web and native application projects, owning technical direction, code reviews, and delivery timelines.
- Established architectural standards for React Native and Next.js projects, reducing onboarding time by ~30% and improving codebase consistency across all active engagements.

Full Stack Engineering

- Architected and built full-stack web and native applications using **React Native, React.js, Next.js, TypeScript, and Node.js**, delivering scalable, production-ready solutions for enterprise clients.
- Designed and implemented serverless backend services using **Azure Functions and Azure Cosmos DB**, enabling low-latency data access for high-concurrency applications. Configured CI/CD pipelines and GitHub Actions for automated deployment.
- Drove end-to-end product development lifecycle from scoping through production deployment, consistently shipping features within 2-week sprint cycles.

AI & Automation

- Integrated **OpenAI and Claude (Anthropic) APIs** into client platforms, building LLM-powered features including intelligent search, content generation, and AI-assisted workflows that reduced manual operations by ~35%.
- Designed and deployed a **Retrieval-Augmented Generation (RAG)** pipeline using vector databases and LLM inference to power context-aware product and content recommendations within an enterprise eCommerce environment.
- Built **AI Agents and MCP Server** integrations to automate repetitive engineering tasks, reducing time-to-delivery for recurring platform configurations and deployment workflows by an estimated 40%.

Senior Full Stack Engineer (Contract)

Next Generation Technologies (NGT) | Remote | Dec 2022–Feb 2023 (Contract)

- Built a high-performance marketing website from scratch using **Next.js, Tailwind CSS, and Sanity CMS**, delivering a fully responsive, content-managed experience with dynamic page rendering in under 6 weeks.
- Implemented rich interactive UI animations using **Framer Motion**, elevating visual quality and user engagement.
- Integrated Sanity's structured content API with Next.js SSR/SSG strategies, improving Lighthouse performance scores by 20+ points and cutting page load times by ~40%.

Freelance / Independent Contracts

Self-Employed | Remote | Jan 2020–Present

Client: Wesspur — Senior Full Stack Engineer, eCommerce & ERP

Seattle, WA | Jan 2022–Present

- Led full **SuiteCommerce** website development and redesign, delivering a modernized, performance-optimized eCommerce platform on NetSuite with MySQL-backed catalog management within a 4-month timeline.
- Engineered large-scale data migration and synchronization pipelines for **50,000+ SKUs**, building custom import/export tooling for item data, pricing, and catalog management.
- Developed custom NetSuite **Suitelets and RESTlets** to extend ERP functionality, enabling bespoke business logic for fulfillment, inventory, and CRM workflows.
- Translated Figma designs into a library of 30+ reusable frontend components, ensuring pixel-accurate implementation and cross-browser compatibility.

Client: Discount Low Voltage — Senior Full Stack Engineer, eCommerce

Seattle, WA | Jan 2020–Present

- Owned all ongoing development and maintenance of a **Magento 2** storefront integrated with Oracle NetSuite, supporting a catalog of **340,000+ SKUs**.
- Built and maintained a custom **NetSuite CRM integration**, automating order processing, customer data synchronization, and fulfillment workflows via RESTlet APIs with PostgreSQL-backed reporting.
- Developed scalable spreadsheet management tooling and data manipulation pipelines to maintain catalog integrity across hundreds of thousands of product records.
- Delivered 50+ iterative UI/UX improvements and feature releases over 4+ years, maintaining 99.9% storefront uptime and supporting sustained revenue growth.

Full Stack Engineer — Headless eCommerce

Final.co | Remote | Aug 2020–Mar 2021

- Delivered a full site redesign and rebuild as a **headless Shopify implementation** using React.js, Gatsby.js, and the Shopify Storefront API, replacing the legacy Liquid storefront with a performant JAMstack architecture.
- Integrated Shopify's Storefront API with Gatsby's static site generation, achieving sub-1s page loads and 90+ Lighthouse scores across Core Web Vitals.

- Built a 25+ component React library for product pages, cart, and checkout flows, reducing new feature development time by ~50%.

Full Stack Engineer — NetSuite

LabLearning | Remote | May 2019–Mar 2020

- Led a complete platform rebuild of LabLearning.com in **NetSuite**, replacing the existing site with a fully integrated SuiteCommerce implementation.
- Performed all frontend and NetSuite backend development, including **SuiteScript customizations**, custom modules, and UI enhancements across the platform.
- Managed the project end-to-end across a 10-month engagement, coordinating requirements, sprints, QA, and go-live with stakeholders.

Full Stack Engineer

Nuun Hydration (via GRAYBOX) | Seattle, WA | Mar 2017–Jul 2018

- Led a complete platform migration from **ExpressionEngine to Shopify/NetSuite**, rebuilding the web presence for a nationally recognized consumer brand and launching within a 5-month timeline.
- Owned all stages of product development from prototyping through production deployment, delivering a reliable, tested platform on an aggressive timeline.
- Collaborated cross-functionally with design, marketing, and operations teams to align the technical implementation with brand and business requirements.
- Implemented rigorous QA and testing protocols covering 100+ test cases, ensuring zero critical regressions at launch.

Frontend Engineer

Revant Optics (via GRAYBOX) | Remote | Feb 2017–Aug 2018

- Delivered frontend development for eCommerce storefronts built on **Magento**, ensuring responsive, cross-browser-compatible UI across product and checkout experiences.
- Configured and maintained **AWS infrastructure** for production web instances, managing Docker containers and deployment pipelines to ensure uptime and CI/CD reliability.

Full Stack Engineer

MyIdCare | Remote | Apr 2018–Nov 2018

- Designed and implemented the full platform from custom design through production deployment, owning both frontend (**Vue.js, HTML5/CSS3, jQuery**) and backend (ExpressionEngine) development end-to-end.

Education & Certifications

B.A. Psychology / Human-Computer Interaction — Lewis & Clark College, Portland, OR (2008–2012)

NetSuite SuiteCommerce Developer — Oracle NetSuite, 2020
